

## 1. Install **Open Worship** app

2. It is blocked when open

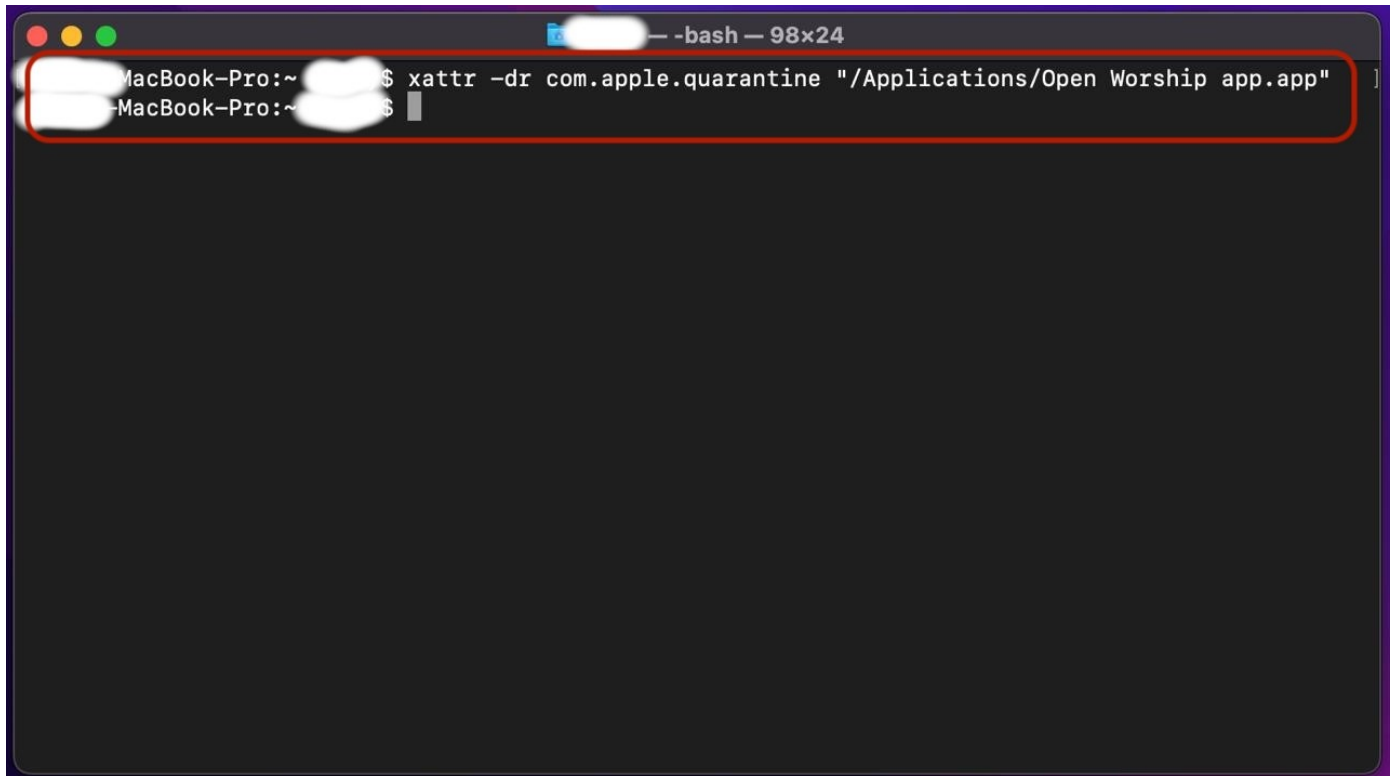

### 3. Open **Terminal**

4. Execute command: **xattr -dr com.apple.quarantine "/Applications/Open Worship app.app"**

- copy **xattr -dr com.apple.quarantine "/Applications/Open Worship app.app"**
- paste to **Terminal**
- type **Enter** key

A screenshot of a macOS Terminal window. The title bar at the top shows three colored window control buttons (red, yellow, green) on the left, a blue icon in the center, and the text "-bash - 98x24" on the right. The terminal has a dark background with white text. The prompt "MacBook-Pro:~" is visible. The command "xattr -dr com.apple.quarantine "/Applications/Open Worship app.app"" has been entered and is highlighted with a red rectangular box. A second prompt "MacBook-Pro:~" is visible on the line below, with a cursor at the end.

```
MacBook-Pro:~ $ xattr -dr com.apple.quarantine "/Applications/Open Worship app.app"
MacBook-Pro:~ $
```

5. App should working fine
